Biofuel Research Journal

DOI: 10.18331/BRJ2019.6.2.1

Aims and Scope

Biofuel Research Journal (BRJ) is an open access online journal and completely free-of-charge publishes original articles, review articles, case studies, book reviews, short communications, and hypotheses on the fundamentals, applications, processing, and management of biofuels technologies.

The journal's aim is to advance and disseminate knowledge in all the biofuel-related areas of biodiesel, bioethanol, biogas, biomass, algae, bioreactions, bioreactors, membrane-bioreactors, fermentation, biorefinery (e.g. membrane separation technology), bioprocess, applied microbiology, combustion, and bioresource technologies associated with conversion or production of biofuels. Moreover, novel and integrated biofuel processing and hybrid systems as well as energy audit for biofuel production plants are of interest. The journal also seeks to publish articles with a focus on the application of artificial photosynthesis for biofuels production, carbon footprint analysis, strategies for limiting green house gas (GHG) emissions, life cycle assessment (LCA) and exergy analysis of biofuel production/application, impacts of biofuels production/consumption on climate change, futuristic pathways for biofuels production, and promotion of biofuel applications in the developing world for indigenous development.

BRJ calls for papers that cover the following fields:

Biofuels: biodiesel, bioethanol, biobuthanol, biogas, etc.

Biofuels production, modeling, and economics

Bioprocesses and bioproducts: Bioreactions, biocatalysis, bioreactors, membrane-bioreactors, modeling and optimization, scale-up, supercritical technology, ionic liquids, and fermentations.

Biomass and feedstock utilization: Bioconversion of agro-industrial residues.

Biorefinery: Membrane separation technology, adsorption, solvent-extraction, etc.

Environmental protection: Simultaneous biological waste treatment and biofuels production, clean development mechanism.

Thermochemical conversion of biomass: Combustion, pyrolysis, gasification, catalysis.

Algal biofuels and energy crops including energy crops genetic engineering

Application of artificial photosynthesis for biofuels production

Carbon foot-printing analysis and strategies for limiting green house gas (GHG) emissions: Life cycle assessment (LCA) analysis of biofuel production/application pathways and Compliance with the international standards (such as PAS 2050:2011 and ISO 14040:2006).

Exergy analysis of biofuel production/application pathways

Technoeconomic analysis of biofuel production/application

Impacts of biofuels production and consumption on climate change

Futuristic pathways for biofuels production

Biofuel applications in the developing world for indigenous development

BRJ also covers the following fields:

- Process scale-up and economic analysis
- Process integration and zero discharge strategies
- Resource recovery
- Water-energy balance improvements
- Energy audit for biofuels production plants

Editor-in-Chief

Assist. Professor Meisam Tabatabaei, Biofuel Research Team (BRTeam), University Technology MARA (UiTM), Shah Alam, Selangor, Malaysia, Tel: +60 3 55442000 E-mail: meisam_tabatabaei@uitm.edu.my

International Advisory Board Members

Professor Yusuf Chisti, School of Engineering, Massey University, Private Bag 11222, Palmerston North, New Zealand, Tel: +64 6 350 5934, E-mail: y.chisti@massey.ac.nz

Professor Ahmad Fauzi Ismail, Advanced Membrane Technology Research Centre (AMTEC), Universiti Teknologi Malaysia 81310, Skudai, Johor, Malaysia, Tel: +60 7 553 5592, E-mail: afauzi@utm.my

Professor Seeram Ramakrishna, Mechanical Engineering Department, National University of Singapore (NUS), Singapore, Tel: +65 6516 2216, E-mail: seeram@nus.edu.sg

Professor Solange I. Mussatto, Novo Nordisk Foundation Center for Biosustainability, Technical University of Denmark, Denmark, Tel.: +45 93511891, E-mail: smussatto@biosustain.dtu.dk

Editorial Board Members
